This email account will be checked periodically for incoming emails. All emails will be uploaded into the specified infoRouter folder path.

InfoRouter E-mail Scanner Configuration

The screenshot displays the 'infoRouter E-mail Scanner Service Controller' window. The main interface is titled 'infoRouter E-mail Scanner - Service Cont' and shows the service status as 'Stopped' with a red square icon. Below this, there are 'Start Service' and 'Stop Service' buttons. The 'E-mail Scanner Settings' section includes fields for 'Pop3 Server Name', 'Mail Account Name', 'Mail Account Password', 'infoRouter User Name' (set to 'sysadmin'), 'infoRouter User Password' (masked with dots), and 'infoRouter Target Path'. A 'Folder Browser' dialog is open over the settings, showing a list of folders: '...', 'Accounting', 'Accounting_2', 'Advertising', 'Civilian Contracts', 'Civilian Proposals', 'Collateral (Public Access)', 'Corporate', 'Documentation', 'Engineering', 'ext-Accounting', and 'ext-Market Research'. A blue callout box points to the dialog with the text: 'Select an infoRouter folder path to upload incoming emails.' The status bar at the bottom left indicates 'Service Is Stopped'.

Select an infoRouter folder path to upload incoming emails.

InfoRouter E-mail Scanner Configuration

You can repeat the process to define/configure multiple e-mail account – infoRouter folder pairs.

Usage Scenario:

You can create an e-mail account called bills@acme.com

Ask vendors to send you electronic bills to this e-mail account.

Configure e-mail scanner to watch incoming emails into this account.

Route all incoming bills into a folder called “Incoming Bills/Invoices”

Authorize several users to access and manage these invoices by giving them access to the folder you created (“Incoming Bills/Invoices”).

This way, you have all incoming invoices in one central spot.

All invoices can be processed and tracked in a central location.

You can also use infoRouter workflows to process these invoices.

InfoRouter E-mail Scanner Configuration

You can configure multiple e-mail accounts to be automatically monitored by this tool.

Once you are finished defining these e-mail accounts, simply click on the “Start Service” button.
